

RATCHAYA SURADECHARITTHIKUL

Software Engineer | Frontend-focused Full-stack Developer

✉ ratchaya.gun@gmail.com | ☎ 096-941-3606 | 📍 Bangkok, Thailand | 🌐 github.com/Ratchaya99 | 🌐 [Portfolio](#)

Professional Summary

Software Engineer with 5+ years of experience building production web applications across banking, enterprise, and software house environments. Frontend-focused with strong expertise in React, Next.js, React native, and Flutter, complemented by hands-on backend experience with Node.js, NestJS, Laravel, RESTful APIs, and relational databases. Experienced in building features end-to-end, modernizing legacy systems, integrating frontend and backend services, and improving code quality, maintainability, and system reliability.

Skills

Frontend: React, Next.js, TypeScript, Angular, React Native, Flutter, HTML, CSS, SCSS, Tailwind CSS

Backend: Nest.js, Laravel, RESTful APIs, PHP

Database: PostgreSQL, MySQL

Architecture & Quality: Clean Code, Scalable Architecture, Code Review, System Integration, Unit Testing, Jest, Playwright

State Management: Zustand, Redux, MobX, Context API, Bloc

Workflow: Docker, GitHub, GitLab, Azure DevOps, Agile/Scrum

Work Experience

Apar technologies – Onsite at Siam Commercial Bank (SCB)

Front End Developer (June 2025 – July 2026)

- Developed and maintained enterprise internal banking systems supporting branch operations and account lifecycle workflows.
- Migrated and refactored legacy AngularJS features to Next.js, improving maintainability and supporting a more scalable frontend architecture.
- Provided frontend technical guidance and consulted with team members on problem clarification, solution design, and implementation approaches to resolve complex issues effectively.
- Investigated backend issues through Java Spring Boot service analysis, API logic review, and Kibana log investigation.
- Applied OWASP Top 10 security practices, including Content Security Policy (CSP), to improve application security and meet enterprise compliance requirements.

Achievements:

- Reduced code investigation and root-cause finding time from several hours to under 1 minute by consistently using commit messages with task IDs to trace business logic conditions, later becoming a team standard practice.
- Maintained 80–90% unit test coverage across key frontend modules using Jest.
- Reduced central review comments from 10+ per feature to near zero through proactive code review and quality checks.

More Studio Co., Ltd.

Front End Developer (January 2022 – May 2025)

- Developed web and mobile applications for enterprise clients across multiple domains, including fund platforms, service-based e-commerce applications, and EV charging applications using Next.js, React Native, Flutter, and Laravel.
- Developed responsive frontend applications using modern web technologies and integrated RESTful APIs to deliver business features and user-facing functionality.
- Developed and maintained Laravel-based backend APIs, business logic, and CMS functionality, translating business requirements into backend solutions and integrating them with frontend applications.
- Independently owned approximately 80% of WordPress projects, managing end-to-end development from initial setup, theme customization, and backend configuration through deployment and client handover.
- Worked within Agile development processes, participating in code reviews, Git-based collaboration, sprint planning, estimation, and engineering best practices across multiple concurrent projects.
- Contributed to technical documentation, knowledge sharing, and mentoring junior developers and interns.

Achievements:

- Delivered an average 10+ production projects per year, supporting multiple concurrent tasks and resolving urgent issues across 2–3 parallel work areas daily through rapid investigation and context switching.
- Unblocked teammates by taking ownership of WordPress tasks, allowing them to stay focused on their primary projects; also provided WordPress guidance and knowledge sharing to help teammates handle projects independently.

Yes Web Design Studio

Web Developer (February – November 2021)

Intern Web Developer (2020, 2 months)

- Developed and launched multiple client websites using WordPress, HTML, CSS, PHP, and JavaScript.
- Managed website projects from start to deployment.
- Provided consulting and coding support to improve website functionality and performance.

Achievements:

- Improved Google PageSpeed Insights score from red zone (<50) to green zone (90+) by using cache plugins, reducing CSS/JS, lazy loading images, and using Cloudflare CDN.

Education

Silpakorn University – Bachelor of Science (B.Sc.) in Business Information Technology

- Graduated with 2nd Class Honors.
- Teaching Assistant for JAVA & PHP courses, mentoring students in programming fundamentals.
